

## SAFETY DATA SHEET FOURTRESS PROTECT PRE/POST

According to Regulation (EC) No. 1272/2008 on Classification, Labelling and Packaging of Substances and Mixtures.

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

**Product name** FOURTRESS PROTECT PRE/POST

**Product number** HDD44

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

**Identified uses** Teat Treatment

**Uses advised against** Not for direct contact with Food or Beverage stuffs. Not for oral consumption.

#### 1.3. Details of the supplier of the safety data sheet

**Manufacturer** Holchem Laboratories Limited  
Gateway House, Pilsworth Road, Pilsworth Industrial Estate, Bury, Lancashire (UK), BL9 8RD

#### 1.4. Emergency telephone number

**Emergency telephone** Out of Office Hours Emergency Information:-  
For accidents and spillages involving this product that pose a threat to the environment, or human health, or require immediate first aid advice call:- +44(0) 7050 265597.  
Note:- This number will not accept order queries or calls dealing with equipment breakdowns.  
This product is registered with the NPIS. UK Environment Agency 24hour Advisory Service 0800 807060. Irish Environmental Protection Agency 1890 335599 (This is a Lo Call Number)

### SECTION 2: Hazards identification

#### 2.1. Classification of the substance or mixture

##### Classification (EC 1272/2008)

**Physical hazards** Not Classified

**Health hazards** Eye Dam. 1 - H318

**Environmental hazards** Not Classified

#### 2.2. Label elements

##### Hazard pictograms

**Signal word** Danger

**Hazard statements** H318 Causes serious eye damage.  
EUH208 Contains p-menthan-3-one. May produce an allergic reaction.

## FOURTRESS PROTECT PRE/POST

**Precautionary statements** P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P501 Dispose of contents/ container in accordance with national regulations.  
P337+P313 If eye irritation persists: Get medical advice/ attention.

**Contains** LACTIC ACID

**Detergent labelling** < 5% anionic surfactants, < 5% non-ionic surfactants

### 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

## SECTION 3: Composition/information on ingredients

### 3.2. Mixtures

|                       |                                                  |                      |
|-----------------------|--------------------------------------------------|----------------------|
| <b>LACTIC ACID</b>    |                                                  | <b>1-5%</b>          |
| CAS number: 79-33-4   |                                                  | EC number: 201-196-2 |

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

**Composition comments** To the best of our knowledge, all of the substances used in this product are being supported for the relevant application in REACH.

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

**General information** No specific recommendations.

**Inhalation** Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues.

**Ingestion** Do not induce vomiting. Rinse mouth thoroughly with water. Get medical attention if symptoms are severe or persist.

**Skin contact** Promptly wash contaminated skin with water. Get medical attention if any discomfort continues.

**Eye contact** Remove any contact lenses and open eyelids wide apart. Rinse immediately with plenty of water. Get medical attention if symptoms are severe or persist after washing.

**Protection of first aiders** First aid personnel should wear appropriate protective equipment during any rescue.

### 4.2. Most important symptoms and effects, both acute and delayed

## FOURTRESS PROTECT PRE/POST

|                            |                                                                                                                                                                                                                                                                               |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General information</b> | Neat product may cause permanent eye damage.                                                                                                                                                                                                                                  |
| <b>Inhalation</b>          | Unlikely route of exposure. Inhalation of sprayed droplets may result in soreness of the throat, mouth and nose.                                                                                                                                                              |
| <b>Ingestion</b>           | Unlikely route of exposure without deliberate abuse. There may be soreness and redness of mouth and throat. A soapy taste may be reported. May cause irritation/discomfort to mucous membranes. Similar but less severe symptoms will be seen if dilute chemical is ingested. |
| <b>Skin contact</b>        | There may be mild irritation at the site of contact.                                                                                                                                                                                                                          |
| <b>Eye contact</b>         | This product is corrosive. May cause serious eye damage.                                                                                                                                                                                                                      |

### **4.3. Indication of any immediate medical attention and special treatment needed**

|                             |                                                        |
|-----------------------------|--------------------------------------------------------|
| <b>Notes for the doctor</b> | Contains acids and surfactants in an aqueous solution. |
|-----------------------------|--------------------------------------------------------|

## **SECTION 5: Firefighting measures**

### **5.1. Extinguishing media**

|                                     |                                                                                                 |
|-------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b> | The product is non-combustible. Use fire-extinguishing media suitable for the surrounding fire. |
|-------------------------------------|-------------------------------------------------------------------------------------------------|

### **5.2. Special hazards arising from the substance or mixture**

|                         |                                            |
|-------------------------|--------------------------------------------|
| <b>Specific hazards</b> | On heating irritating fumes may be formed. |
|-------------------------|--------------------------------------------|

### **5.3. Advice for firefighters**

|                                                      |                                                                                                                                                                                              |
|------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Protective actions during firefighting</b>        | Protective clothing and respiratory protection should be worn when tackling fires involving this product. Control run-off water by containing and keeping it out of sewers and watercourses. |
| <b>Special protective equipment for firefighters</b> | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.                                                                                        |

## **SECTION 6: Accidental release measures**

### **6.1. Personal precautions, protective equipment and emergency procedures**

|                             |                                                                               |
|-----------------------------|-------------------------------------------------------------------------------|
| <b>Personal precautions</b> | Wear protective clothing as described in Section 8 of this safety data sheet. |
|-----------------------------|-------------------------------------------------------------------------------|

### **6.2. Environmental precautions**

|                                  |                                                                                                                                                       |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Environmental precautions</b> | Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body. |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|

### **6.3. Methods and material for containment and cleaning up**

|                                |                                                                                                                                                                                                                                                                                                                              |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Methods for cleaning up</b> | Stop leak if possible without risk. Absorb in vermiculite, dry sand or earth and place into containers. Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### **6.4. Reference to other sections**

|                                    |                         |
|------------------------------------|-------------------------|
| <b>Reference to other sections</b> | See sections 8, 12 & 13 |
|------------------------------------|-------------------------|

## **SECTION 7: Handling and storage**

### **7.1. Precautions for safe handling**

|                          |                                                                                                                                                                                     |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Usage precautions</b> | Refer to section 8. Wear suitable protective equipment for prolonged exposure and/or high concentrations of vapours, spray or mist. Read and follow manufacturer's recommendations. |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### **7.2. Conditions for safe storage, including any incompatibilities**

|                            |                                                                                                                                                              |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage precautions</b> | Keep container tightly closed. Store in a demarcated bunded area to prevent release to drains and/or watercourses. Keep above the chemical's freezing point. |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|

## FOURTRESS PROTECT PRE/POST

### 7.3. Specific end use(s)

|                            |                                                  |
|----------------------------|--------------------------------------------------|
| <b>Specific end use(s)</b> | Teat Treatment                                   |
| <b>Usage description</b>   | This product is formulated for teat disinfection |

## SECTION 8: Exposure controls/Personal protection

### 8.1. Control parameters

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Ingredient comments</b> | Where an exposure level is quoted, a risk assessment should consider if there is a need to monitor the atmosphere of the working environment. Results should be compared against the WEL and/or DNEL information provided. Where a worker is exposed to levels approaching a limit, further exposure control measures should be considered to reduce exposure to the substance. DNEL and/or PNEC information is supplied by manufacturers of substances in accordance with REACH legislation (Regulation (EC) No 1907/2006) , and is used to provide suitable risk reduction measures to limit exposure of the user of the substance to a non hazardous level. If the measured level of exposure by a route divided by the DNEL for the route is greater than 1, then further exposure controls should be implemented as described in section 8.2. Where new information becomes available under REACH, this will be passed on as revisions to the Safety Data Sheet. |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 8.2. Exposure controls

#### Protective equipment

#### Appropriate engineering controls

As this product contains ingredients with exposure limits, process enclosures, local exhaust ventilation or other engineering controls should be used to keep worker exposure below any statutory or recommended limits, if use generates dust, fumes, gas, vapour or mist.

#### Personal protection

The PPE indicated above is not a COSHH assessment. It represents PPE that should be considered during the manufacture, distribution, use and final disposal stages of this product's life cycle. It is the responsibility of employers to conduct a COSHH/risk assessment to determine appropriate PPE levels. The information given below should be used to support this assessment. Where possible replace manual processes with automated or closed processes to minimise contact with the product.

#### Eye/face protection

Wear approved, tight fitting safety glasses where splashing is probable. Refer to EN Standard 166 to select appropriate level of protection.

#### Hand protection

Rubber (natural, latex). Neoprene. Polyvinyl chloride (PVC). Refer to Standard EN 374 and EN 16523

#### Other skin and body protection

Wear suitable protective clothing as protection against splashing or contamination. Reference to EN 13832 and EN 943 is useful when selecting footwear and clothing.

#### Hygiene measures

Provide eyewash station and safety shower. Promptly remove non-impervious clothing that has become contaminated, provided it is not adhered to the skin.

#### Respiratory protection

No specific recommendation made, but respiratory protection must be used if the general level exceeds the Workplace Exposure Limit.

#### Environmental exposure controls

Do not allow the substance to contaminate surface water/ground water. See points 6, 12 & 13.

#### General Health and Safety Measures.

A full Risk Assessment should be carried out before handling any chemical(s). Risk Assessments should refer to COSHH, and any other relevant legislation or industry specific guidelines governing the use of chemicals.

## FOURTRESS PROTECT PRE/POST

### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

|                                                     |                                                                                                               |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Appearance</b>                                   | Liquid                                                                                                        |
| <b>Colour</b>                                       | Orange/red                                                                                                    |
| <b>Odour</b>                                        | Peppermint                                                                                                    |
| <b>pH</b>                                           | 2.5 - 3.5                                                                                                     |
| <b>Melting point</b>                                | Not applicable.                                                                                               |
| <b>Initial boiling point and range</b>              | Not applicable.                                                                                               |
| <b>Flash point</b>                                  | Not applicable. Contains no Flammable Components                                                              |
| <b>Evaporation rate</b>                             | Not applicable.                                                                                               |
| <b>Evaporation factor</b>                           | Not applicable.                                                                                               |
| <b>Flammability (solid, gas)</b>                    | Not applicable.                                                                                               |
| <b>Upper/lower flammability or explosive limits</b> | Not applicable.                                                                                               |
| <b>Vapour pressure</b>                              | Not applicable.                                                                                               |
| <b>Vapour density</b>                               | Not applicable.                                                                                               |
| <b>Bulk density</b>                                 | Not applicable.                                                                                               |
| <b>Solubility(ies)</b>                              | Soluble in water.                                                                                             |
| <b>Partition coefficient</b>                        | Not applicable. Technically not feasible.                                                                     |
| <b>Auto-ignition temperature</b>                    | Not applicable.                                                                                               |
| <b>Decomposition Temperature</b>                    | Not applicable.                                                                                               |
| <b>Viscosity</b>                                    | Not determined.                                                                                               |
| <b>Explosive properties</b>                         | Not applicable.                                                                                               |
| <b>Explosive under the influence of a flame</b>     | Not considered to be explosive.                                                                               |
| <b>Oxidising properties</b>                         | Does not meet the criteria for classification as oxidising. Not applicable. Contains no Oxidising Components. |

#### 9.2. Other information

|                                  |                             |
|----------------------------------|-----------------------------|
| <b>Refractive index</b>          | Not applicable.             |
| <b>Particle size</b>             | Not applicable.             |
| <b>Molecular weight</b>          | Not applicable.             |
| <b>Volatility</b>                | Not applicable.             |
| <b>Saturation concentration</b>  | Not applicable.             |
| <b>Critical temperature</b>      | Not applicable.             |
| <b>Volatile organic compound</b> | Not applicable.             |
| <b>Explosive Properties</b>      | Not Classified as Explosive |
| <b>Storage Temperature Range</b> | 4-40 Degrees C              |

## FOURTESS PROTECT PRE/POST

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

**Reactivity** Not expected to react when correctly stored and used. Mixing with other chemicals may produce unexpected reactions.

#### 10.2. Chemical stability

**Stability** Stable at normal ambient temperatures and when used as recommended. - See note 10.6.

#### 10.3. Possibility of hazardous reactions

**Possibility of hazardous reactions** Mixing with Hypochlorite based chemicals could result in the evolution of Chlorine Gas.

#### 10.4. Conditions to avoid

**Conditions to avoid** Avoid excessive heat for prolonged periods of time.

#### 10.5. Incompatible materials

**Materials to avoid** Bleach. Chlorinated detergents. Caustic Detergents

#### 10.6. Hazardous decomposition products

**Hazardous decomposition products** Does not decompose when used and stored as recommended. - See section 10.5.

### SECTION 11: Toxicological information

#### 11.1. Information on toxicological effects

##### Acute toxicity - dermal

**ATE dermal (mg/kg)** 66,666.67

##### Respiratory sensitisation

**Respiratory sensitisation** No evidence of respiratory sensitisation for any component of this formulation.

##### Skin sensitisation

**Skin sensitisation** No evidence of skin sensitisation for any component of this formulation.

##### Carcinogenicity

**Carcinogenicity** The components of this formulation will not be systemically available in the body under normal conditions of handling. As a consequence it is not expected to cause cancer.

##### Reproductive toxicity

**Reproductive toxicity - fertility** The components of this formulation will not be systemically available in the body under normal conditions of use and handling. As a consequence it is not expected to be toxic to the reproductive system or developing foetus.

##### General information

See section 4.2.

##### Inhalation

Unlikely route of exposure. Inhalation of sprayed droplets may result in soreness of the throat, mouth and nose. - See section 4.2.

##### Ingestion

Unlikely route of exposure without deliberate abuse. There may be soreness and redness of mouth and throat. A soapy taste may be reported. May cause irritation/discomfort to mucous membranes.

##### Skin contact

Under normal conditions of use exposure time will be short and the likelihood of causing skin irritation will be very low. Long exposure may result in skin dryness.

##### Eye contact

Corrosive to eyes

## FOURTRESS PROTECT PRE/POST

### SECTION 12: Ecological information

**Ecotoxicity** This product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

#### 12.1. Toxicity

##### Acute aquatic toxicity

**Acute toxicity - fish** Normal use is unlikely to pose a hazard to the environment.

#### 12.2. Persistence and degradability

**Persistence and degradability** The surfactant(s) used in this preparation complies (comply) with the biodegradability criteria as laid down in the European Detergents Regulation No 648/2004 as amended.

#### 12.3. Bioaccumulative potential

**Bioaccumulative potential** Not expected to bioaccumulate.

**Partition coefficient** Not applicable. Technically not feasible.

#### 12.4. Mobility in soil

**Mobility** The product contains substances which are water soluble and may spread in water systems.

#### 12.5. Results of PBT and vPvB assessment

**Results of PBT and vPvB assessment** This product does not contain any substances classified as PBT or vPvB.

#### 12.6. Other adverse effects

**Other adverse effects** Not determined.

### SECTION 13: Disposal considerations

#### 13.1. Waste treatment methods

**General information** When handling waste, the safety precautions applying to handling of the product should be considered. Do not mix with other chemicals.

**Disposal methods** Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. Small volumes of use solution can be disposed of to sewers.

### SECTION 14: Transport information

**General** The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

#### 14.1. UN number

Not applicable.

#### 14.2. UN proper shipping name

Not applicable.

#### 14.3. Transport hazard class(es)

No transport warning sign required.

#### 14.4. Packing group

Not applicable.

#### 14.5. Environmental hazards

## FOURTRESS PROTECT PRE/POST

**Environmentally hazardous substance/marine pollutant**

No.

### 14.6. Special precautions for user

Not applicable.

### 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable.

**Annex II of MARPOL 73/78  
and the IBC Code**

## SECTION 15: Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

**EU legislation** European Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging of Substances and Mixtures.  
This replaces Directive 67/548/EEC - Classification, Packaging and Labelling of Dangerous Substances and Regulation (EC) No. 453/2010 relating to the Classification, Packaging and Labelling of Dangerous Preparations. Also considered is the REACH Regulation (EC) No.1907/2006.

### 15.2. Chemical safety assessment

**Pcs Information** An aqueous solution of 3% Lactic Acid and 0.25% Chlorhexidine Gluconate Authorisation Holder:- Holchem Laboratories Ltd, Gateway House, Bury, BL9 8RD.

**Pcs Number** PCS No:- 98975

No chemical safety assessment has been carried out.

## SECTION 16: Other information

**Abbreviations and acronyms used in the safety data sheet** (EC) No. 1272/2008 : EU Regulation on Classification, Labelling and Packaging of Substances and Mixtures.  
NPIS - National Poisons Information Service.  
vPvB - Very Persistent, Very bioaccumulative.  
PBT - Persistent, Bioaccumulative & Toxic.  
REACH - Registration, Evaluation, Authorisation & restriction of CHemicals (Regulation EC 1907/2006).  
DNEL - Derived No Effect Limit.  
PNEC - Predicted No Effect Concentration.  
COSHH - Control of Substances Hazardous to Health.  
Industry - Refers in section 8 to application of the substance in an industrial process.  
Professional - Refers in section 8 to application/use of the preparation/product in a skilled trade premises.

**General information** This document is a Safety Data Sheet, NOT a CoSHH assessment. It is the customer's responsibility to conduct a full CoSHH assessment, taking into account the information held within this document along with other local factors considered in a risk assessment. The Risk and Hazard statements listed below are the full text of abbreviations used in this document. They are not the final classification, for this refer to section 2.

**Revision comments** Product Launch

**Revision date** 15/12/2016

**SDS number** 24448

## FOURTRESS PROTECT PRE/POST

### Hazard statements in full

H312 Harmful in contact with skin.  
H315 Causes skin irritation.  
H318 Causes serious eye damage.  
H400 Very toxic to aquatic life.  
H410 Very toxic to aquatic life with long lasting effects.  
EUH208 Contains p-menthan-3-one. May produce an allergic reaction.

### REACH extended MSDS comments

REACH requires that persons handling chemicals should take the necessary risk management measures, in accordance with assessments from manufacturers and importers of chemical substances. The relevant recommendations must be passed along the supply chain. These assessments are generally reported in Exposure Scenarios. Where Exposure Scenarios have been provided for substances used in this product, the relevant information is incorporated into the safety data sheet.

### END OF SAFETY DATA SHEET

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.
